TOKENOMICS

VERSION 1.4

CryptoSimple Token

CryptoSimple (\$CSR) will be a limited-issue utility token for use on the platform. The token functions for the following capabilities in the CS Wallet:

- **Rewards and cashback for loyal users.**
- **Exclusive benefits: discount in advisory fees, additional APR on savings.**
- **Referral bonuses.**
- **Staking.**

These types of utility rewards are well-established in the industry, and are commonly used with wallets, exchanges, crypto debit cards, and other financial services in the DeFi industry.

Rewards for users are funded through the initial rewards pool and from a percentage of the swap fees collected on use of the tokens. The treasury maintains an ongoing rewards pool based on the fees collected.

As with any other token on the market, the \$CSR token can be used as DeFi vehicle for yield farming and liquidity pools.

We plan to integrate the token into the CryptoSimple app in 2025.

STAKING POOL

The staking reward pool provides additional income for participants who staked their \$CSR token and incentivise token holding behavioral patterns. The staking reward pool is funded through a monthly token release. Following is the staking pool release rate:

Release Rate	% Portion
Year 1	35.00 %
Year 2	25.00 %
Year 3	20.00 %
Year 4	15.00 %
Year 5	5.00 %
